Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner suggested claim language to Applicant to render the claims allowable. Claims 2 and 10 were amended to incorporate the limitation encompassing growth of the cells on the porous membrane matrix, into the method steps to give it patentable weight, and also to recite that the detector layer of cells is overlain with a liquid layer to allow diffusion of the test compounds through the porous membrane into the cells. Claims 4-8, 11-13, and 15-19 were also amended to correct improper multiple dependencies.
